EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sean Pryor on August 9, 2007.

The application has been amended as follows: The additions to the claim limitations are shown by <u>underline</u>, and the deleted portions of the claim limitations are shown by a <u>strikethrough</u>.

Claim 9. A method for driving a liquid crystal display comprising the steps of:

displaying a plurality of frames in one second, wherein each of said plurality of frames is divided into subframes of a number that is an integer larger than 2, of 2 or more, wherein each of said plurality of subframes comprises a red image, a green image and a blue image,

compressing original video signals by 1/(3n) times in a time axis direction by an n-speed field sequential color signal generation circuit, where n is an integer of 2 or more,

writing a video signal for one of the red image, the green image and the blue image, and turning on the corresponding one of the red, the green and the blue backlight after finishing the writing of the video signal,

wherein said liquid crystal display comprises a plurality of first thin film transistors formed over a substrate, and said n-speed field sequential color signal generation circuit comprises a second thin film transistor formed over said substrate,

Application/Control Number: 09/427,639

Art Unit: 2629

wherein as least one of the first thin film transistors and the second thin film transistors has a channel forming region comprising a crystalline crystallized silicon, and

wherein at least one of the first thin film transistors and the second thin film transistors has a low concentration impurity region adjacent to the channel forming region.

2. The following is an examiner's statement of reasons for allowance:

With respect to claims 1-45, the prior art of record fails to teach a driving method for a liquid crystal display compressing original video signals by 1/(3n) times in a time axis direction by an n-speed field sequential color signal generation circuit, where n is an integer of 2 or more.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Srilakshmi K. Kumar whose telephone number is 571 272 7769. The examiner can normally be reached on 9:00 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sue Lefkowitz can be reached on 571 272 3638. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
